

Van Dam (Mr)

Fullstack Web Engineer

HIGHLIGHTS

- 1 years of experience in enterprise software development.
- 1 years of experiences in front-end development using ReactJS, VueJS, Typescript.
- 1 years of experiences in back-end development using NodeJS, ExpressJS, Apollo Server, RESTful, GraphQL, Java, Spring, Groovy.
- Experience in Agile/Scrum projects.
- Have knowledge on Figma.

TECHNICAL SKILLS

- Frameworks and Technologies
 - JavaScript:
 - Experience working with JavaScript and TypeScript
 - Experience working with ReactJS and VueJS frameworks
 - Good knowledge on Bootstrap, Element UI, Ant design and CSS HTML/HTML5
 - Experienced in building backend with NodeJS, ExpressJS, Apollo Server, Java, Spring, Groovy, Spock
 - Java:
 - Experienced in building backend with Java, Spring, Groovy, Spock, Liquibase
 - C#:
 - Experience working with C# and Windows Form, Bunifu
- Database: MongoDB, MySQL
- Platforms: Windows, Linux RHEL
- IDEs: IntelliJ IDEA, WebStorm, MS Visual Studio, MS Visual Studio Code
- Scrum/Agile tool: JIRA, Azure, Gitlab, Github
- Build tool: Webpack, NPM, YARN, Gradle, Maven
- Container: Docker
- Design tool: Figma

RELEVANT PROJECT

Health Care Platform

Back-End Developer

The healthcare platform handles data from customers, provides tools and services for medical examination and treatment, patient health monitoring, and is connected to many hospitals and clinics.

Responsibilities

- Join in technical discussion and tasks estimation
- Fixing bugs and implement new features
- Review code and technical support for other members
- Follow the Agile process

Technologies

- Java
- Groovy
- Spring
- Spock
- SQL Server
- Liquibase
- Gradle
- Nodejs
- MongoDB
- Javascript
- Angular
- Jenkins
- Kubernetes
- RESTful API
- Docker
- Azure

Digital Transformation for Real Estate

Front-End Developer

A pioneering real estate technology platform that allows users to participate in buying, selling and renting all types of real estate.

Responsibilities

- Join in technical discussion and tasks estimation
- Fixing bugs and implement new features
- Review code and technical support for other members
- Follow the Agile process

Technologies

- C
- Java
- GraphQL
- NextJS
- ApolloClient
- Type Script
- Git
- Docker
- Azure

Game With Me Platform

Full-stack Developer

The platform provides the basic features of a social network dedicated for gamer and manages transactions between users. Anyone participating can rent other users' time just to play games together.

Responsibilities

- Analyze requirements
- Design database and architecture
- Develop core UI components
- Develop GraphQL APIs

Technologies

- Java Script
- ReactJS
- Ant design
- MongoDB - Mongoose
- NodeJS
- GraphQL
- Apollo-Express
- Cloudinary
- Git

YouTube Boost

Front-End Developer

This web app allows to increase engagement with videos in a mainstream way according to YouTube's engagement policy.

Responsibilities

- Analyze requirements
- Design UI
- Select technologies, frameworks and implements the front-end core components
- Review code and support for other members
- Follow the Agile process

Technologies

- VueJS
- Element UI
- Rest APIs
- Nodejs
- ExpressJs
- Puppeteer
- MongoDB - Mongoose
- Gitlab

EDUCATION

CANTHO UNIVERSITY – CANTHO, Vietnam

2016 - 2021

Bachelor of Software Technology
